

SHIP FROM STORE CASE STUDY

# Shipping Software For Manhattan Active Omni

**MEN'S WEARHOUSE®** The drive to meet consumer demand, balance inventory and optimize fulfillment has pushed e-Commerce delivery from distribution centers to stores. While theoretically advantageous, store-level shipping presents a number of significant challenges: carrier selection is limited, services aren't supported and rate shopping is near impossible.

Logistyx solves this problem with Logistyx Transportation Management Execution™ (TME), a solution that provides stores with instant access to carriers and services that offer the best

rates for each particular location. Seamlessly integrated with Manhattan's Active Omni system using the Manhattan and Logistyx Parcel Handler Interface (PHI), the solution supports multi-carrier rate shopping, shipment execution and label generation with accurate charge data, real-time shipment tracking and proof of delivery.

Logistyx TME also provides unprecedented security, performance and control. Advanced encryption, access control and continuous penetration testing ensure data remains safe.

High availability server, data and application architecture guarantees the solution can seamlessly scale to meet large retail networks and shipment volume. Central administration resources allow real-time measurement of carrier performance and maintenance of store-level carrier options.

*"We set an ambitious goal to integrate and take the new shipping solution across 1,800 stores and multiple distribution centers. Only the dedication and close cooperation of Manhattan Associates and Logistyx's project teams helped achieve this objective."*

— Uma Bhemisetty  
Vice President Of Retail Systems

## FULL FEATURED, ENTERPRISE SHIPPING PLATFORM

- Supports international destinations with access to 8,500+ global parcel carrier services, including low cost regional and local operators.
- Maintains unique, rules-based, carrier and service selections for each location.
- Provides complete, rules-based rating, manifesting and tracking functionality.
- Reports accurate carrier charge data, transit status and proof of delivery.
- Includes management dashboard to monitor carrier performance and spending.

## Logistyx TME Multi-Carrier Ship-From-Store Solution for Manhattan's Active Omni Solution

In addition to standard shipping functionality, Logistyx TME supports store-level, scenario-based rating and routing. This capability allows management to compare rates, including those from low cost regional and local operators, before selecting the optimal carrier and service selection for each location.

For large retail operations, the solution may be scaled to support an unlimited number of stores with concurrent rating, routing and execution processes. Logistyx TME is available as an on-premise or cloud-based solution with competitive, transaction-fee based pricing available to select customers.

### LOGISTYX INTEGRATES WITH MANHATTAN'S ACTIVE OMNI TO SUPPORT EXISTING WORKFLOWS:

1. Orders are released to stores for fulfillment.
2. Pick ticket is generated for each order.
3. Order is picked, packed and weighed.
4. Shipment data, including 'ship via' instructions are transmitted to Logistyx TME.
5. With 'ship via' instructions, Logistyx TME uses internal rate groups to retrieve the optimal carrier(s) and services.
6. Logistyx TME transmits single or multiple rating options.
7. Options are reviewed manually or processed automatically.
8. The selected rating and routing option is transmitted to Logistyx TME for processing.
9. As directed, Logistyx TME executes the shipment and retrieves the tracking number and charge data.
10. Data, including the label image / file is transmitted for output and consumption by SI&F.
11. The shipment is labeled and tendered to the carrier.
12. Throughout the delivery process, Logistyx TME provides real-time tracking status and proof of delivery.

Logistyx Technologies offers flexible multi-carrier shipping software solutions that help companies reduce order-to-delivery costs while boosting efficiency and choice.
